DETAILED ACTION

Claims 1-60 are pending in the present application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-30 and 60, drawn to a method for purifying poly(A)RNA, classified in class 435, subclass 6.
- II. Claims 31-59, drawn to a method for purifying poly(A)RNA, classified in class 435, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

According to MPEP 803.01 restriction is proper between patentably distinct inventions where the inventions are: (1) The inventions must be independent (see MPEP § 802.01, § 806.04, § 808.01) or distinct as claimed (see MPEP § 806.05 - § 806.05(i)); and (2) There must be a serious burden on the examiner if restriction is required (see MPEP § 803.02, § 806.04(a) - § 806.04(i), § 808.01(a), and § 808.02). In the instant case, the different inventions are drawn to two distinct methods having different starting materials and different method steps. Although the purpose of both methods is the isolation of poly(A) RNA, the two methods are distinct. The present inventions comprise different method steps. The methods disclosed comprise different method steps and different limitations such the search for one is not necessarily coextensive with a search for the other. Thus, each is separately patentable.

Art Unit: 1636

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Conclusion

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Konstantina Katcheves whose telephone number is (703) 305-1999. The examiner can normally be reached on Monday through Friday 7:30 to 4:30.
